

## **Protocol Guide**

## **Protocol support for Advenica ZoneGuard**

- The Advenica ZoneGuard Services are software applications that enable more protocols for bidirectional filtered transfer.
- Running multiple services or even multiple instances of the same service in parallel is supported.

| ZoneGuard Service     | Supported protocol or application |
|-----------------------|-----------------------------------|
| HTTP Service          | HTTP/HTTPS, SOAP                  |
| Email Service         | SMTP, POP3                        |
| File Transfer Service | FTP, SFTP, SMB, NFS               |

Version 1.0

Advenica can help you tailor new services for your specific use-case.
