

Advenica Environmental Goals

Advenica Environmental Goals

Advenica Environmental targets are linked to the environmental policy. This is a certification requirement for ISO 14001.

Advenica is a small company with high awareness of environmental issues.

Advenica wants to work for a sustainable environment thinking where we engage the employees in Advenica's contribution to a sustainable environment.

Our office is centrally located, close to communications and the company has bicycles for lending to employees – in this way the company can influence the emissions in the environment.

If it is possible we have meetings over skype to minimise travel.

To the greatest extent we can make environment conscious choices regarding:

- Travel and transportation, we shall once a year check our CO2 emissions to see if it increases or decreases.
- Sort our waste for recycling.
- Stay joined in the Elkretnen.se to recover old electronics.
- Keep our chemical binder updated once a year.
- Affect the environment by choosing organic and KRAV (demand) labeled food and cleaning products to the greatest possible extent, our goal is that 70 % of our food and cleaning products shall be ecologic or KRAV labeled.
- Once a year check that our subcontractors have ISO 14000 certificates.
- We shall follow the laws and regulations that are imposed on us. We do this by making a yearly compliance check.

Made in Sweden

Advenica provides expertise and world-class high assurance cybersecurity solutions for critical data in motion up to Top Secret classification. We enable countries, authorities and companies to raise information security and digitalise responsibly. Founded in 1993, we are EU approved to the highest level of security. Our unique products are designed, developed and manufactured in Sweden.
